ASI CLINICAL TRANSLATION SCHOOL

CONNECT | COLLABORATE | INNOVATE

18-20 SEPT 2024

## The second ASI Clinical Translation School will be held at Q Station in Manly, Sydney

This in-person intensive 2-day School will host a stellar line-up of clinical translation speakers, and an engaged network of up-and-coming researcher students.

The course is designed for clinical trainees in disciplines related to immunology, including autoimmunity, allergy, infectious disease, oncology, and primary immunodeficiency, as well as higher-degree students and clinical fellows with a passion for translational research that will advance human disease diagnosis and therapy.

The program will consist of presentations by scientists and clinicians, as well as round-table discussions to give in-depth understanding of recent advances and emerging themes in immunology, and immunological technologies.

Participants will have the opportunity to present their research questions and receive feedback.

Travel bursaries and prizes will be awarded!
